

ABD ALRHMAN FAYYAD

Computer Science Student | Junior Full-Stack Developer

Amman, Jordan | abdalrhman.fayyad.dev@gmail.com

abd-alrhmanfayyad.github.io/portfolio | github.com/abd-alrhmanfayyad

linkedin.com/in/abd-al-rhman-fayyad-78a7312b5

TECHNICAL SKILLS

Programming Languages: C#, C++, Python, Java, SQL

Backend Development: ASP.NET Core Web API, REST APIs

Frontend: HTML, CSS, JavaScript, Bootstrap

Data Access: Entity Framework Core (EF Core), Dapper

Database: Microsoft SQL Server, Azure Data Studio, SQL Queries, Joins, Stored Procedures, Indexes, Database Design

Authentication & Security: JWT Authentication, Authorization, Password Hashing

Programming Concepts: Object-Oriented Programming (OOP), CRUD Operations, Data Structures and Algorithms, Problem Solving

Development Tools: Visual Studio, VS Code, Git, GitHub, Postman

EDUCATION

Bachelor's Degree in Computer Science
Al al-Bayt University | Oct 2023 – Expected Jan 2027
Academic Standing: Excellent | GPA: 3.62

LANGUAGES

Arabic – Native | English

ADDITIONAL INFORMATION

Open to internships and entry-level opportunities in .NET, backend, and full-stack development.

PROFESSIONAL SUMMARY

Computer Science student with a strong interest in backend development and .NET technologies. Familiar with C#, Object-Oriented Programming, ASP.NET Core Web API, SQL Server, Entity Framework Core, Dapper, REST APIs, and JWT authentication, with hands-on frontend work in HTML and CSS. Currently seeking an entry-level .NET, backend, or full-stack opportunity to apply technical skills, gain professional experience, and contribute to real-world software projects.

PROJECTS

School Management System

Graduation project · In progress

- Building the backend API for a bilingual (Arabic/English) system with role-based access for admins, teachers, students, and parents.
- Implemented JWT authentication, secure password hashing, and modules for students, classes, assessments, and grades using Clean Architecture.

C# · ASP.NET Core Web API · EF Core · SQL Server · JWT

Jordan Navigation System

Algorithms course

- Console app that plans trips between Jordanian cities, combining Dijkstra's algorithm for shortest paths with a greedy approach for ordering stops.

C++ · Dijkstra's algorithm · Greedy algorithm

Personal Portfolio Website

Orange Coding Academy

- Responsive, mobile-first portfolio built from scratch and deployed with GitHub Pages.

HTML · CSS · Flexbox · Grid · Git

PRACTICAL DEVELOPMENT

- Built ASP.NET Core Web APIs and RESTful endpoints using DTOs and request/response models.
- Worked with SQL Server queries, joins, stored procedures, and indexes.
- Practiced database access using both Dapper and Entity Framework Core.
- Implemented JWT authentication, authorization, and secure password hashing workflows.

COURSES & TRAINING

Orange Coding Academy – Web Development Training

Orange Digital Village · Oct 2026 – Present

C# .NET with MS SQL: Complete Beginner to Master 2026

Udemy · Completed Sept 2026
